

California OES Weather Threat Briefing

Monday, June 14, 2021
9:00 AM PDT

Day 1 (Monday): Very hot temperatures will build across much of southern California today, with high heat risk impacts expected. Locally critical fire weather conditions are also expected across the Death Valley area and Santa Barbara County mountains and south coast.

Regional Operations Center
Salt Lake City, UT*

WEATHER KEY POINTS

06/14/21 - 06/20/21

Monday - Sunday

- Lingered showers will end across far northwest California today, leaving dry and increasingly hot weather through next weekend
- A widespread and long-duration heat wave will impact much of the state through the week and into the weekend, with temperatures gaining several degrees each day, peaking Wednesday through Saturday. High temperatures will range from 100 to 110 degrees across the Central Valley by mid and late week, while inland areas of southern California range from 100 to 120 degrees, even hotter near Death Valley. **These temperatures will be dangerous for a large segment of the population!**
 - Extreme heat will significantly increase the potential for heat related illnesses, particularly for those working outdoors, participating in outdoor activities, and those who are heat sensitive
- Elevated to locally critical fire weather conditions can also be expected along and east of the Sierra as well as the southern California mountains through next weekend as winds gust 25-40+ mph at times and very dry weather continues
 - The most critical fire weather conditions are expected across Santa Barbara County where localized gusts to 60 mph are likely tonight through Tuesday night, and in and around Death Valley through tonight

CALIFORNIA WEATHER IMPACTS

06/14/21 - 06/20/21

<u>Hazards / Day</u>	MON	TUE	WED	THU	FRI	SAT	SUN

HEAT RISK FORECAST

06/16/21 - 06/18/21

Wednesday

Thursday

Friday

Category	Level	Meaning	Category	Level	Meaning
Green	0	No Elevated Risk	Red	3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Yellow	1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration	Magenta	4	Very High Risk for entire population due to long duration heat, with little to no relief overnight
Orange	2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration			

WEATHER OUTLOOK

06/19/21 - 06/27/21

6-10 Day Outlook (June 19 – June 23)

Temperatures

- Above normal temperatures are strongly favored to continue statewide

Precipitation

- Near normal precipitation is favored for much of the state, with below normal precipitation favored across far northern California

8-14 Day Outlook (June 21 – June 27)

Temperatures

- Above normal temperatures are favored statewide once again

Precipitation

- Near normal precipitation is favored across central and southern California, with below normal precipitation favored for northern California
